

TECHNICAL BULLETIN

medite FR®

FINISHING NOTICE

The formulation of Medite FR® includes the addition of various chemicals that may affect how this panel responds to certain paint coatings and decorative overlay surface treatments. This includes the adhesives that may be employed with certain laminates. These chemicals may cause paints, adhesives and laminates to react differently compared to other MDF products. It is strongly recommended that compatibility of these surface treatments or adhesive systems be tested and evaluated prior to production.

If you have any questions on this or any technical issue, please contact your SierraPine sales representative.
